

## **OPERATING SAFETY**

- Never exceed the capacity of the hoist ring, see Table 1 for UNC threads and Table 2 for Metric threads.
- When using lifting slings of two or more legs, make sure the forces in the legs are calculated using the angle from the horizontal sling angle to the leg and select the proper size swivel hoist ring to allow for the angular forces.

## **HR1200 UNC Threads**

## TABLE 1

- Designed to be used with Ferrous workpiece only

  \* Ultimate load is 5 times the Working Load Limit. Individually proof tested to 2-1/2 times the Working Load Limit.
- Tightening torque values shown are based upon threads being clean, dry and free of lubrication.
- Long bolts are designed to be used with soft metal (i.e., aluminum) workpiece. While the long bolts may also be used with ferrous metal (i.e., steel & iron) workpieces, short bolts are designed for ferrous workpieces only.
- Bolt specification is a Grade 8 Alloy socket head cap screw to ASTM A574. All threads are UNC 3A
- Bolt specification is a Grade 12.9 Alloy socket head cap to DIN 912. All threads are metric (ASME/ANSI B18.3.1m).
